

29 January 2019

Part Change Notice

Effective immediately, Magnetics will begin transitioning labelling of powder core toroids (Kool M μ [®], Kool M μ [®] MAX, MPP, High Flux, XFlux[®], and 75 Series) from white or black ink to laser etching. The Magnetics part number and lot number will continue to be listed on each toroidal core.

During this transition period, customers may receive lots containing cores marked with white or black ink with other lots marked with laser etching.

Please contact your Magnetics Sales Engineer or Customer Service Representative, or email magnetics@spang.com, with questions or concerns.
