

Magnetics has expanded its large powder core toroid line
 Kool M μ [®] • MPP • High Flux

Magnetics has added five new sizes to its toroid powder core line, including the massive 165 millimeter core. Large toroids are a cost-effective option for high current applications, such as: Uninterruptible Power Supplies (including transformerless UPS), large Power Factor Correction (PFC) chokes and inverters for renewable energy (solar/wind/fuel cell conversion).
