Magnetics Distribution Center Reorganization

Magnetics will be reorganizing our Asia and USA warehouse locations during the second half of 2018. This change will enable us to better serve our global customer base by having inventory consolidated at two locations.

Our Asia warehouse will be located at our Xiamen, China factory. We will be transferring inventory from the Hong Kong warehouse to Xiamen during the summer months and plan to make the last shipments from the Hong Kong warehouse on 31 July 2018. Our Hong Kong Sales office will remain open to continue servicing our customers in Asia.

Our USA warehouse will move to a new facility in Phoenix, AZ. We will begin stocking the new warehouse during the 3rd quarter of 2018 and will close the East Butler, PA facility by the end of 2018. Our Pittsburgh, PA Sales office will remain open to continue servicing our customers in North America and Europe.

During the transition period, it may be necessary to take shipments from both facilities in the region based on part availability. This will be temporary as all Magnetics parts will be available from our Xiamen, China and Phoenix, AZ distribution centers in the 4th quarter of 2018. We will work closely with our customers to minimize disruptions.

Please contact your Sales or Customer Service Representative with any questions.
